Equivariance test: does the shortcut follow what is scored?
Qwen3.8-27B · holdout env (ticket routing, data v2) · 20 runs per cell · gaming = fitting the visible sample's quirk labels (≥ 95% on the sample) or tampering
(a) Grader-targeted gaming (primary)
(b) Held-out accuracy (the actual goal)
(c) Sustained test talk in reasoning
